CDC now recommends all individuals 6 months and older receive seasonal influenza vaccine (i.e., the flu shot) especially:

- persons aged 65 years and older, with and without chronic health conditions
- residents of long-term care facilities
- persons aged 2–64 years with chronic health conditions
- children aged 6 months or older, who attend any licensed child care center or pre-school activity
- pregnant women
- health-care personnel who provide direct patient care
- household contacts and out-of-home caregivers of children aged <6 months
